Request for Proposal

RDCK Wildfire Risk Reduction Prescription Development 2026

ADDENDUM NO. 1

Issued: November 24, 2026

Closing Date: 11 AM PST, December 10, 2026

This Addendum shall be read in conjunction with and considered as an integral part of the Contract Documents; revisions supersede the information contained in the original specifications or previously issued Addendum. Price submitted shall include all items of this Addendum.

By this **Addendum No. 1**, dated November 24, 2026, the Request for Proposal documents for the RDCK Wildfire Risk Reduction Prescription Development shall be amended as specified below.

QUESTIONS & ANSWERS:

Question 1: What is the expectation for determining the need for third-party assessments and associated costs in Section 4. Financial, Table (a) Optional Value-Added Services, given that this is typically informed by the background review and constraints analysis undertaken in Phase 1?
Answer 1: The Proponent shall develop estimates of anticipated third-party costs based on publicly available information, local knowledge, and professional expertise, recognizing that the need for, and scope of, third-party assessments may be further defined as part of prescription development.

Question 2: Are the costs in this table combined with the Price Sheet costs? Or are they accounted for separately? (What is the $ the proponent is scored on?)
Answer 2: Proponents will be scored on the cost sheet for prescription development and community engagement included in Schedule C of the NRFP.

Question 3: If third-party assessments are required, who contracts them? The proponent or RDCK?
Answer 3: RDCK would contract third-party assessments if/when needed.

Question 4: Are the costs we list the maximum? What if the actual cost comes in higher?
Answer 4: The costs that proponents list in Section 4, Table (a), Optional Value-Added Services serve as information on approximate estimated costs. The RDCK is required to gather a number of quotes should a third-party professional be required to ensure cost effective service delivery.

Question 5: Has RDCK been engaging with First Nations? Are any archaeological assessments anticipated?

Answer 5: For Treatment Areas on Crown land, The Province of British Columbia has been clear that it is their responsibility to complete First Nations consultation and information sharing. The intention is for this to be completed by the Province once a draft prescription is available.

Except as modified by Addendum No. 1 issued November 24, 2026, the Request for Proposal documents for PRJ #2026-184 shall remain unchanged.

Jessie Lay
Acting Disaster Adaptation & Mitigation Senior Advisor
