

Temporary Chlorination Notice

Issued: Apr 05 2022 12:47PM PDT by RDCK Water Notifications
Locations: [Home](#)

The RDCK will be providing chlorination to the Burton Water System on the following dates: April 6th to April 27th. Water users may experience chlorine odour or taste during the temporary chlorination.

Instructions

If you are concerned about odour or taste, fill a pitcher of drinking water and set it aside for several hours to let the chlorine dissipate.

Additional Information

Due to several historical bacteriological positive samples in the distribution system, temporary chlorination is scheduled for spring and fall each year as per the adopted Water Quality Action Plan. For more information contact the RDCK (250) 352-8161 or 1-800-268-7325 ext. 8161, or visit our website at www.rdck.ca/water.
