

## Water System Leak Detection

Issued: **Apr 27 2023 9:30AM PDT** by RDCK Water Notifications

Locations: **Work**

Effective May 9, operators will be performing leak detection on the Burton Water System. Users may experience brief water outages on May 9, 10 and 11 from 8:00 AM to 5:00 PM.

### Instructions

The RDCK requests that users limit water use during the time outlined, and to flush water through a tap after leak detection has been completed until it is clear and odourless. Please avoid doing laundry during this time.

### Additional Information

This work is being done to detect water main leakage, and requires sections of the distribution system to be isolated with the water turned off. Increased turbidity (suspended sediment) may result once the water is restored to the section of isolated water main. We apologize for any inconvenience this might cause, and appreciate your cooperation and patience during this time. For more information contact the RDCK (250) 352-8161 or 1-800-268-7325 ext. 8161, or visit our website at [www.rdck.ca/water](http://www.rdck.ca/water).
