

Climate Action Workbook

Hello - thank you for taking a look at the RDCK Climate Action workbook. This document provides more information about the actions we are working on to reduce risk and increased community resilience.

It is a work in progress.

And we invite you to join us as we learn about what climate action looks like in rural communities. As we investigate and implement, our learning may impact the actions. We will do our best to report and document all changes either here or in the RDCK State of Climate Action reporting.

Many of RDCK Climate Actions are already in staff workplans. About 1/3 of the actions are new or not already in workplans. These are identified by the following symbol: NEW

If you have questions or comments, please reach out to us - climateaction@rdck.bc.ca or rdck.ca/ClimateAction

LAND USE & PLANNING

GOAL

RDCK policies and decision-making frameworks/guidelines support and promote healthy, sustainable, and low-carbon lifestyles for all residents, and minimize risks associated with natural hazards

OBJECTIVES

Update planning policies and bylaws to guide future development to create resilient, accessible and livable communities

ACTION

Review of Official Community Plans (OCPs) to integrate climate action, renewable energy, housing availability and affordability, and complete community considerations

TIMELINE

2023-2030

NEXT STEPS

- Focus on renewable energy, active and low carbon transportation and development that supports accessible services On-Going
- Develop common climate action language to ensure a coordinated and efficient regional approach 2023-2024

BENEFITS & CONSEQUENCES

- Integration of climate action considerations into development processes
- Consistency and integration of climate action lens across Regional District

POLICIES, RESOURCES, TOOLS

OCPs

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M&A

ACTION

Provide planning support to communities interested in zoning amendments and improvements

TIMELINE

On-Going

NEXT STEPS

- Educate communities on the potential benefits of zoning and solicit feedback on support for introduction of zoning (this as part of the Area H OCP review On-Going
- Use re-zoning (subdivisions) as an opportunity for case-specific development considerations/requirements (eg. land contributions for bus stops, money for future active transportation connections, etc.) On-Going

BENEFITS & CONSEQUENCES

- More control and influence in rural development of zoned areas
- Signals to development community that RDCK prioritizes compact communities, active & low carbon transportation

POLICIES, RESOURCES, TOOLS

OCPs

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

ACTION

NEW

Work strategically with Ministry of Transportation and Infrastructure (MoTI) and BC Parks to increase connectivity and multi-modal options for movement

NEXT STEPS

• Pursue collaboration for multi-modal transportation infrastructure (hubs, bike stalls, e-bike stalls, etc.) - 2023-2030

BENEFITS & CONSEQUENCES

- Decreased transportation-related emissions
- Health benefits
- Supports green economy (e-bikes)

POLICIES, RESOURCES, TOOLS

• Ministry guidelines on active transportation infrastructure development

TIMELINE

2023-2030

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M

ACTION NEW

Integrate access to public greenspace, recreation, and active transportation networks

TIMELINE

2023-2026

NEXT STEPS

- Integrate this work with the community amenity assessment work to support the regional active transportation ecosystem development efforts 2023-2026
- Focus on protection and restoration of ecosystems On-Going

BENEFITS & CONSEQUENCES

• This has many co-benefits including protecting integrity of landscape functions, greenspace, urban heat island effect, urban agriculture, the affect of natural areas on culture/human health, biodiversity protection, planning for the reduction/adaptation of climate change risks - wildfire, flood, etc.

POLICIES, RESOURCES, TOOLS

- Parks & Trails Strategy
- Recreation Master Plans
- OCPs
- Regional parks dataset

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M&A

ACTION

Incentivize
local farming,
increased farm
use, and decreased
redevelopment of
Agricultural Land
Reserves

NEXT STEPS

- Build capacity within the planning department on how to include these considerations into planning documents 2023-2024
- Maintain or expand the area of land in the ALR and viable agriculture parcels (while still protecting forested areas) On-Going
- Consider ways to incentivize active farming on ALR land 2023-2026
- Consider ways to support new and small farmers (farm leases, zoning to support collectives/co-ops, etc.) 2023-2030
- Collaborate with regional partners to provide support to established and new farmers in strengthening their businesses 2023 2030

TIMELINE

2023-2030

BENEFITS & CONSEQUENCES

- Supports local resiliency, and strengthens local food systems
- Work with regional partners to support climate resilient crops that are adaptive to drought On-Going

POLICIES, RESOURCES, TOOLS

- Central Kootenay Food Policy Council (Evidence Based Planning Project)
- Kootenay and Boundary Adaptation Strategies for Agriculture Plan

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M & A

ACTION NEW

Research and learn from how other regional districts have used alternative/ innovative strategies to guide regional development

TIMELINE

2023

NEXT STEPS

- Look for local government leaders in climate resilient rural development On-Going
- Pursue collaboration with other neighbouring regional districts On-Going

BENEFITS & CONSEQUENCES

 Avoid reinventing the wheel by learning from other local government's development processes

POLICIES, RESOURCES, TOOLS

OCPs (looking for policy overlap)

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A

NEW

Consider the development of Regional Growth Strategies in areas experiencing growth pressures or at a minimum coordinate land use planning in consultation with RDCK municipalities for those adjacent settlement areas, ensure the consideration of housing availability and affordability in these discussions

TIMELINE

On-Going

NEXT STEPS

- Provide continued education and engagement processes -2023-2026
- Consider how to increase the attractiveness of a coordinated regional development strategy to municipalities and electoral areas and how to introduce it in manageable pieces - 2023-2026

BENEFITS & CONSEQUENCES

• Create a more coordinated approach to regional development (infrastructure, neighborhood planning, etc.)

POLICIES, RESOURCES, TOOLS

Regional Planning

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION M & A

OBJECTIVES

Leverage planning policy to reduce the risk threshold of community development decisions and projects

ACTION

Integration of the Community Wildfire Resiliency Plans (CWRPs) and floodplain mapping into all OCP's

NEXT STEPS

- Proactively update OCPs in identified high-risk/priority areas 2023-2024
- Develop standardized policy statement wording that will be used to integrate CWRPs into OCPs - 2023-2024

BENEFITS & CONSEQUENCES

• Help communities prepare and adapt to climate impacts/risks

POLICIES, RESOURCES, TOOLS

- RDCK's National Disaster & Mitigation Program data
- Community Wildfire Protection Plans

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: A

ACTION

TIMELINE

2023-2024

Utilize hazard Development Permit Areas (DPA) and riparian DPAs to guide resilient development in high-risk areas and protect ecosystems

NEXT STEPS

• Collect data on these efforts to improve the process over time - On-Going

BENEFITS & CONSEQUENCES

Alternative way to influence/control development decisions

POLICIES, RESOURCES, TOOL

Development Permit Areas for hazard, wildland urban interface, and riparian areas

CONTROL /INFLUENCE: Control **MITIGATION /ADAPTION:** M&A

TIMELINE

On-Going

Development Permit Areas can be created to support the OCP objectives of protecting developments from hazardous conditions in the environment - such as flooding, erosion, land slip, rock falls, and fire hazards - and protecting the natural environment, including sensitive ecosystems and biodiversity

TRANSPORTATION & MOBILITY

GOAL

An integrated active and low-carbon regional transportation network (ecosystem) supporting universal access to services and amenities

OBJECTIVES

Promote and support mobility for residents (with a focus on vulnerable communities) through locally initiated multi modal programs and infrastructure

ACTION

Integrate local community groups into the development of active transportation networks

NEW

TIMELINE

2023-2026

NEXT STEPS

- Advocate to connect rural neighborhoods to safe and convenient active transportation naths
- Advocate to improve transit connections between all rural neighbourhoods to other communities
- Develop Regional Active Transportation Strategy

BENEFITS & CONSEQUENCES

• Special interest community groups can lobby and act quickly (eg. Castlegar-Nelson active transportation route = case study) but guidance must be developed to ensure that these efforts/projects are efficient/effective

POLICIES. RESOURCES. TOOLS

- Transit Future Service Plan (TFSP)
- Regional Active Transportation Strategy
- Parks and Trails Strategy
- Recreation Master Plans

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M

ACTION

Collaborate with regional partners on innovative low-carbon transportation solutions

NEXT STEPS

- Host a transportation think tank to generate innovative ideas and identify collaboration opportunities - 2022
- Emphasize a focus on equity and universal access in the shift to low-carbon transportation 2023-2026
- Collaborate on a webmap to detail the regional transportation ecosystem 2023-2030
- Consider using & supporting community halls as 'hubs'/nodes for multi-modal transportation 2023-2030
- Consider ways to support and incentivize carshares/rideshares/bikeshares, shuttle services, and multi-modal low-carbon transport 2023-2030

TIMELINE

2022-2026 (On-Going)

BENEFITS & CONSEQUENCES

- Improve public access to multi-modal, low-carbon transportation options
- Reduce transportation-related carbon pollution

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M & A

ACTION

Increase Transit ridership

NEXT STEPS

- Free ridership (subsidized, or reduced cost) for all or for certain demographics (eg. low-income, seniors, students, etc.) -2026 2030
- Work towards a taxpayer-based transit service 2030
- Gain public support through outreach & education On-Going
- Encourage and promote employer bus-pass programs 2023-2026

TIMELINE

On-Going

BENEFITS & CONSEQUENCES

- Increased cost-feasibility/self-sufficiency and efficiency of transit services
- Decreased community emissions

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M

NEW

Conduct or support community amenity assessments

TIMELINE

2023 - 2026

NEXT STEPS

- Develop community amenity inventories (start with nodes/primary amenities (hospitals, schools, rec centres, parks) - 2023-2026
- Review rural potential active transportation methods 2024-2026
- Explore inter-regional collaboration opportunities 2023-2030

BENEFITS & CONSEQUENCES

• Characterize opportunities, limitations, and needs for active transportation network to allow for effective solutions to be selected

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A

OBJECTIVES

Create an internal corporate structure and access to expertise that can support the shift to regional low-carbon transportation (zero-emission vehicles, buses, e-bikes/scooters, carshares, trains, ferries) within/between rural areas and municipalities

ACTION

Consider Regional
Active Transportation
Strategy or alternative
framework of guidelines and/or policy
documents to support
active transportation
projects & initiatives
to exercise governance over regional
active transportation
coordination and
development

TIMELINE

2023-2026

NEXT STEPS

- Prepare project plan and budget for Board's consideration of a Regional Active Transportation Strategy or guideline framework - 2022-2023
- Develop a position and hire an in-field expert (deal with public inquiries, manage contracts, etc.) 2024-2025
- Utilize the Castlegar-Nelson active transportation route development as a case-study to help determine best practice and avoid duplicating pitfalls, and as an opportunity to advocate for the need for an in-house expert/responsible staff to manage public inquiries and contracts, etc (learn from process) 2023-2026

BENEFITS & CONSEQUENCES

- Must strategically consider how to reduce carbon pollution 70% of rural regional emissions are from transportation
- Improve ability (governance) of the RDCK to support a transition to low-carbon transportation
- Health benefits (air quality improvements, increased exercise)
- Supports green economy (e-bikes)

POLICIES, RESOURCES, TOOLS

Castlegar - Nelson connection is a case study

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M

ACTION

NEW

Ensure all new/
upgraded community and corporate
buildings have active
transportation connections

TIMELINE

2023-On-Going

NEXT STEPS

 Promote active and low carbon transportation as part of RDCK regional transportation planning - 2023

BENEFITS & CONSEQUENCES

• Increased active transportation, decreased emissions, increased health

POLICIES, RESOURCES, TOOLS

• 100% Renewable Energy Plan

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M

NEW

Develop policies/ bylaws to support active transportation transition

TIMELINE

2023-2030

NEXT STEPS

- Consider planning/land use development cost charges (use for future active transportation infrastructure), purchase/lease of land for bus stops 2023-2026
- Develop active transportation guidelines/specifications framework for community groups/organizations developing local-scale solutions to reference (eg. rural community road/path dusting, etc.) 2023-2026
- Create strategy for network hubs (look to RDEK for template) 2026
- Begin pilot programs for hubs 2030

BENEFITS & CONSEQUENCES

- Increased revenue to fund transportation infrastructure upgrades
- Increased ability of RDCK to govern decisions regarding low-carbon transportation infrastructure development

POLICIES, RESOURCES, TOOLS

• Use Provincial active transportation design guidelines/framework to support Regional Active Transportation Strategy (RATS)

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M

OBJECTIVES

By 2035, plan to shift all new cars to be zero emission vehicles (ZEV), which aligns with the Provincial CleanBC goal, and transitioning large diesel vehicles to run on low-carbon fuels

ACTION

Transition RDCK fleet to ZEVs

TIMELINE

2022-2030

NEXT STEPS

- Complete Fleet Inventory 2023
- Conduct Fleet Assessment Study 2023-2024
- Establish procurement policy for local government fleet including lifecycle costs and social costs of carbon 2024-2025
- Follow recommendations from Fleet Study (Passenger 2026), (Commercial 2030)

BENEFITS & CONSEQUENCES

- Characterize and understand fleet limitations, identify ways to reduce carbon pollution and improve efficiency
- Improve data availability on transportation emissions

POLICIES, RESOURCES, TOOLS

- Green or ZEV Fleet Policy
- Leverage/update current RDCK Vehicle and Fleet Policy

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A

ACTION

TIMELINE 2024-2028

Support commercial and industry transition to low-carbon fleets

NEXT STEPS

- Develop and outlay strategies for fleet operators to share experiences on fleet transition - 2024-2026
- Develop Best Practices Guide for fleet owners to convert to ZEVs using own corporate fleet transition as example 2026-2028

BENEFITS & CONSEQUENCES

- Reduced emissions, characterize and understand fleet limitations
- Increase information availability and industry capacity

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M

Coordinate electric vehicle network in regional district

TIMELINE

2023-2026

NEXT STEPS

- Assemble inventory of public spaces suitable for electric vehicle (EV) charging, including at corporate facilities - 2023-2024
- Develop application for level 2 public chargers and guidelines for suitable location selection 2023-2024
- Deploy chargers at RDCK corporate offices 2023-2026

BENEFITS & CONSEQUENCES

- Proactively prepare for the transition to ZEV through infrastructure upgrades
- Improve accessibility of EV infrastructure

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M

ACTION

Develop an EV charging strategy with focus on rural areas, educational material for contractors/ homeowners

TIMELINE

2023-2030

NEXT STEPS

- Develop EV Readiness Guidelines for new buildings to ensure dedicated charging and capacity (BC Building Code Part 3, possibly more policy-based for Part 9) 2023- 2026
- Support EV charger installations in rural communities (grant/rebate application process) -2023-2026
- Top up provincial home/commercial charging infrastructure incentive, partner with neighbouring communities on ongoing active outreach to public and dealers 2023-2026

BENEFITS & CONSEQUENCES

• Increased access and coordination of EV infrastructure to support transition to low-carbon transportation

POLICIES, RESOURCES, TOOLS

• Rural readiness policies available?

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M & A

ACTION

TIMELINE

2023-2030

NEW

Support electrification of Kootenay Lake ferry

NEXT STEPS

- New electric ready vessel will begin service in 2023
- Advocate for all electric operation of new vessel prior to 2030

BENEFITS & CONSEQUENCES

- Reduce emissions
- Advocate for leadership on electrification

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M

GOAL

Transition to a low-carbon and energy resilient future through clean energy strategies, technologies, and cultural shifts (3 E's - Eliminate emissions, Efficiency improvements, Electrification or fuel switching)

OBJECTIVES

Engage in efforts to improve grid resilience and future-proof electrical infrastructure (eg. EV infrastructure, microgrids - smart technologies, panel upgrades in advance, bidirectional flow with EV as battery) for load management of electrical grid, grid-looping, etc.

ACTION

Assist rural communities in increased electrical grid resilience

TIMELINE

2023-On-Going

NEXT STEPS

- Investigate and pilot ways to improve rural energy resiliency and reduce emissions (bi-directional charging, rural micro-grids storage and generation, emergency, emergency resources, input funding or increase support for Wood Stove Exchange Program, etc.) 2023-2026
- Augment pilot projects in rural areas to support energy resilience 2026-2030

BENEFITS & CONSEQUENCES

• Improve grid resilience in rural areas/communities

POLICIES, RESOURCES, TOOLS

• 100% Renewable Energy Plan

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

ACTION

Advocate for future-proofing existing EV infrastructure with regional utilities

NEXT STEPS

- Engage and build relationships with FortisBC, Nelson Hydro and BC Hydro regarding grid resilience pilots 2023
- Follow up with continued relationship building as needed to support rural electrical capacity 2024-2026

BENEFITS & CONSEQUENCES

• Improve grid resilience in rural areas/communities

TIMELINE

2023-2026

POLICIES, RESOURCES, TOOLS

- Bioenergy Opportunities in the Regional District of Central Kootenay (Torchlight Bioresources Ltd, Kerr Wood Leidal)
- Lardeau Power Assessment (Rocky Point Engineering and PBX Engineering)

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

Support a regional transition to 100% renewable energy by 2050

ACTION

Provide education (internally & externally) around how to achieve regional emission targets

TIMELINE

2023-On-Going

NEXT STEPS

- Provide education through climate action culture building efforts 2023-2026
- Focus on switching off 'non-renewable gas', and promoting energy-conservation principles

BENEFITS & CONSEQUENCES

• Influence the culture shift required to address climate change

POLICIES, RESOURCES, TOOLS

• 100% Renewable Energy Plan

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M

ACTION NEW

On-Going focus and coordination of renewable energy installations

NEXT STEPS

- Improve access to grant programs On-Going
- Construct and operate renewable energy systems On-Going
- Consider supporting or partnering with farms on renewable energy installations On-Going

BENEFITS & CONSEQUENCES

• Improve grid resilience in rural areas/communities

TIMELINE

On-Going

POLICIES, RESOURCES, TOOLS

• 100% Renewable Energy Plan

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M

RESOURCE RECOVERY

GOAL

Improve the health of our natural ecosystem by reducing the RDCK's environmental impact through the assessment and diversion of waste from landfills, while simultaneously advancing the recovery of waste through improved waste management and new technologies

OBJECTIVES

Strive to align with CleanBC and aim to divert a significant amount of organic waste from landfills

ACTION

Support curbside organics and recycling collection and expand diversion in rural areas

NEXT STEPS

- Provide public education and engagement opportunities around the benefits of organic collection and composting - 2023-2026
- Build out rural transfer stations for compost and/or explore alternatives for in-home management like backyard composting, Bokashi or FoodCycler 2023-2026
- Encourage the input of agricultural organic waste streams into the regional composting facilities 2023-2026
- Consider the distribution of the produced compost from regional facilities to local farms to support regional food system security and improved soil health, and reduce imported organics - 2023-2026

TIMELINE

2023-2030

BENEFITS & CONSEQUENCES

- Reduced methane emissions from landfills
- Reduced pressure on land from landfill capacity requirements and leachate reduction
- Reduced emissions from the transportation of organics

POLICIES, RESOURCES, TOOLS

- Resource Recovery Plan
- Waste Composition Study when completed
- Multi-phased curbside consultations

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M

ACTION

Investigate Provincial ban on all organics (residential, commercial, institutional, agricultural), (food waste, yard waste, etc.) from landfills by 2030

NEXT STEPS

• Following full implementation of organics diversion program, conduct review of effects and impact of aligning with Provincial ban (likely first step would be a would be a commercial ban in areas with active diversion options). Any action would require stakeholder engagement (eg. survey to assess limitation of the ban) – 2026

BENEFITS & CONSEQUENCES

• Ensures regulatory compliance and reduces community GHG emissions, contribution to carbon pollution reduction targets

POLICIES, RESOURCES, TOOLS

- Resource Recovery Plan
- Waste Composition Study when completed

TIMELINE

2030

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M

Reduce the per capita disposal rate by 29%, from 490 kg per capita (2020 rate) to 351 kg per capita, which is in line with the Province's per capita disposal target

ACTION

Support circular economy innovation

TIMELINE

On-Going

NEXT STEPS

- Circular Economy Think Tank (include construction and other waste streams) to find circular economy solutions 2023
- Consider developing or supporting the development of a circular economy public communications (eg. an online app) 2024-2026
- Pursue pilot projects from the potential solutions that emerge from the Circular Economy Think Tank - 2024-2026

BENEFITS & CONSEQUENCES

- Supports the new compost facilities with increased input material streams
- Influences waste-conscious culture

POLICIES, RESOURCES, TOOLS

- Resource Recovery Plan
- Organic Waste Diversion Strategy

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M

ACTION

Create programs for the diversion of construction and demolition wastes & other organic nonfood wastes

TIMELINE

On-Going

NEXT STEPS

- Pursue pilot projects to determine feasibility and initiate uptake of these programs -2023-2024
- Linked with buildings embodied carbon/lifecycle assessment, new builds/renovations consider impacts of all stages of life cycle - 2023-2030
- Advocate for deconstruction policies in Provincial codes 2023-2026

BENEFITS & CONSEQUENCES

• Contributes to landfill GHG reductions and waste reductions

POLICIES, RESOURCES, TOOLS

Resource Recovery Plan

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M

ACTION

Work towards a user-pays resource recovery system that is financially self-sufficient and incentivizes waste reduction

TIMELINE

2023-2030

NEXT STEPS

- Consider an alternative administrative model for the Resource Recovery system -2023-2030
- Undertake a resource recovery system efficiency study and identify options to improve its cost effectiveness and equitability 2023-2026

BENEFITS & CONSEQUENCES

• Improves the self-sufficiency of the regional resource recovery system and incentivizes waste reductions

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M

Complete a waste composition study to create a baseline for the RDCK and measure effectiveness of Resource Recovery Plan and Organic Waste Diversion Strategy

TIMELINE

2023, 2028

NEXT STEPS

 A comparison between the 2023 and 2028 waste composition studies will allow for assessing the effectiveness of applied measures of the RRP to reducing and diverting waste - 2023-2028

BENEFITS & CONSEQUENCES

• Improves understanding and data availability of/for regional waste streams and carbon pollution

POLICIES, RESOURCES, TOOLS

- Resource Recovery Plan
- Organic Waste Diversion Strategy

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M&A

OBJECTIVES

Reduce the greenhouse gas emissions resulting from regional waste streams

ACTION

NEW

Explore mobile chipping program options (wildfire fuel mitigation, logging, yard waste, landfill wood stream, construction & demolition etc)

TIMELINE

2023-2030

NEXT STEPS

- Consider combining this effort with wood grinding processes at landfills (include mills, forestry, etc) 2023-2026
- Conduct a pilot project to determine feasibility of this program (consider partnering with an industry or municipality) 2023-2026

BENEFITS & CONSEQUENCES

Reduces landfill carbon pollution

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

ACTION

Transition landfills to capture (and ideally use rather than flare) methane emissions

NEXT STEPS

- Investigate flare and capture technology for Ootischenia landfill 2030
- Creston Phase 2 2026-2028
- Design operation closure plan On-Going

BENEFITS & CONSEQUENCES

• Reduces landfill carbon pollution

TIMELINE

On-Going as landfill cells are capped

POLICIES, RESOURCES, TOOLS

Resource Recovery Plan

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M

Landfill septage improved management options assessment including climate/carbon pollution impacts

TIMELINE

2023-2026

NEXT STEPS

• Explore alternate septage management options - 2023-2026

BENEFITS & CONSEQUENCES

• Improves understanding of carbon pollution and how to reduce these

POLICIES, RESOURCES, TOOLS

• Resource Recovery Plan

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M

ACTION

Implement a program to increase the awareness of opportunities to self-manage organic waste

TIMELINE

2023-2026

NEXT STEPS

- This action will be designed in response to the delivery and completion of other components of the Resource Recovery Plan, namely a curbside service
- Food waste reduction campaign, like "Love Food, Hate Waste"
- Financial incentives for purchase of a composter, fermentation kit, or other acceptable equipment that supports on-site management (e.g., a mail-in rebate)
- Workshops on on-site management techniques, e.g., Vermicomposting, fermentation, how to compost in areas with bears
- Support of gleaning programs (a type of food recovery where food that would otherwise go to waste is harvested directly from where it is grown)
- A media campaign done in concert with WildSafe BC
- Develop educational tools and allocate resources to support established food network programs in linking food waste generators with potential users such as to farmers for use as animal feed

BENEFITS & CONSEQUENCES

- Reduces food waste
- Improves understanding of carbon pollution
- Reduces carbon pollution

POLICIES, RESOURCES, TOOLS

- Resource Recovery Plan
- Multi-phased curbside engagement

CONTROL /INFLUENCE: Control + Influence MITIGATION /ADAPTION: M

BUILDINGS - COMMUNITY

GOAL

Accelerate improvements to existing buildings towards improved energy efficiency and reduced operational and embodied carbon pollution

OBJECTIVES

Align new community and residential buildings with provincial Step Code timeline (Part 3 & Part 9 buildings encouraging community organizations and residents to be net-zero ready for all new builds by 2030

ACTION

Encourage residents and businesses to pursue energy audits and/or upgrades

TIMELINE

2023-2024

NEXT STEPS

- Improve and refine Regional Energy Efficiency Program (REEP) with focus on rural communities, promote applicable educational, funding & grant programs and explore a contractor incentive program for rural communities
- Improve building envelopes 2023-2026
- Implement enhanced compliance including mid-construction blower door testing -2023-2026
- Advocate for or provide incentives for contractors (currently most are for homeowners)
 2023-2026

BENEFITS & CONSEQUENCES

- Proactively prepare for higher-step mandates
- New builds built to Step Code standards will help catalyze the process of the RDCK in becoming 100% renewable by 2050

POLICIES, RESOURCES, TOOLS

- BC Step Code
- RDCK Building Bylaws
- Regional Energy Efficiency Program (REEP)
- 100% Renewable Energy Plan

CONTROL /INFLUENCE: Control (up to mandated Step) MITIGATION /ADAPTION: M

ACTION

Support transition to provincial energy step code (net zero by 2032).

TIMELINE

2023-2030

NEXT STEPS

• Consider ways to support or encourage building materials that store carbon or are low carbon, work with contractors and advocate for rural-specific concerns - 2023-2030

BENEFITS & CONSEQUENCES

Proactively prepare for higher-level mandates

POLICIES, RESOURCES, TOOLS

- BC Step Code
- RDCK Building Bylaws
- Regional Energy Efficiency Program (REEP)
- 100% Renewable Energy Plan

CONTROL /INFLUENCE: Control (up to mandated Step) MITIGATION /ADAPTION: M

Encourage residents and businesses to retrofit existing buildings to meet 20-30% energy efficiency improvements

ACTION

Encourage Energuide assessments for renovations and promote funding opportunities for achieving this action

NEXT STEPS

- Adopt Provincial Retrofit Code when it becomes available 2026-2028
- Leverage REEP to identify and retrofit homes with prioritization on high need and vulnerable communities 2023-2030

BENEFITS & CONSEQUENCES

• Reduce energy demand and carbon pollution, and improve home efficiency transparency and comprehension

POLICIES, RESOURCES, TOOLS

- Regional Energy Efficiency Program (REEP)
- (Potentially the Provincial Retrofit Code)

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M

TIMELINE

2023-2026

ACTION

Encourage businesses to pursue funding for commercial energy audits and/or energy efficiency upgrades

NEXT STEPS

- Promote applicable funding/grant programs 2023-2030
- Adopt Provincial Retrofit Code when it becomes available 2026-2028?

BENEFITS & CONSEQUENCES

• Reduce energy demand & carbon pollution

POLICIES, RESOURCES, TOOLS

- Fortis BC Small Business Engagement Program
- (Potentially the Provincial Retrofit Code)

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M

TIMELINE

On-Going

ACTION

Distribute educational materials and resources and promote funding opportunities for homeowners regarding sustainable retrofits and materials

NEXT STEPS

• Create a communities and outreach strategy with REEP - 2023

BENEFITS & CONSEQUENCES

• Education & outreach to public

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M & A

TIMELINE

On-Going

Provide support for heat pumps

TIMELINE

2023-2030

NEXT STEPS

- Ensure that funding and contractor support efforts are available and specific in rural areas On-Going
- Promote contractor participation in Home Performance Contractors Network (HPCN), align wording with HPCN (for retrofits) 2023-2026
- Consider incentivizing heat pump installments through dedicated funding or toppingup of Provincial funding (similar to RDEK - must be decarbonizing, and pre-qualified contractor) - 2023-2030

BENEFITS & CONSEQUENCES

• Reduce energy demand & carbon pollution

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

ACTION

Engage in the development of the Provincial Retrofit Code and advocate for the consideration of rural-specific concerns

TIMELINE

2023-2026

NEXT STEPS

- Participate in the Retrofit Peer Network 2023-2026
- Ensure that building retrofit grant programs are inclusive of farm buildings and promote programs to the farming community - 2023-2030
- Advocate for Province to consider changing regulation/application process on rainwater, greywater, and blackwater applications in a rural context 2023-2026

BENEFITS & CONSEQUENCES

• Supports sustainable decisions and reduced carbon pollution in renovated buildings

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

OBJECTIVES

All buildings and infrastructure construction/renovation projects consider embodied carbon and consumption-based inventories through a Life Cycle Analysis approach

ACTION

Align and collaborate where possible with external embodied emission policy and research efforts (Nelson Next Plan, Nelson embodied emissions benchmarking study/materials guide, CEA Embodied Emissions Guide - Gamechanger

TIMELINE

initiative)

2023-On-Going

NEXT STEPS

- Engage with Nelson (and other local governments/organizations) as they research embodied carbon in the building sphere 2023-2026
- Support related builder training/education programs regarding low-carb on building materials 2023-2026
- Advocate for Province to consider embodied carbon in STEP Code 2023-2026
- Consider how to influence/incentivize supply of low-carbon materials/products (Purchasing Policy) - 2023-2026

BENEFITS & CONSEQUENCES

• Embodied carbon accounts for about half of a building's lifetime carbon pollution and is currently unaddressed through building/STEP code

POLICIES, RESOURCES, TOOLS

- Utilization of DPAs to select for lower carbon landscaping materials
- City of Nelson's Low Embodied Carbon Building Materials Guide & benchmarking Study
- BEAM and other tools
- (Potentially the Provincial Retrofit Code)
- CEA Embodied Emissions Guide

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M

BUILDINGS - CORPORATE

GOAL

Accelerate improvements to existing buildings towards improved energy efficiency and reduced operational and embodied carbon pollution

OBJECTIVES

Align corporate buildings with Provincial Government's Step Code and have all new corporate buildings be net-zero ready by 2030, 2 years ahead of Province's goal (aligns with 100% Renewables Kootenays goal)

ACTION

Adopt timelines to align with transition to provincial energy step code (net zero by 2032).

TIMELINE

2023-2030

NEXT STEPS

- Improve mechanical and electrical systems 2023-2030
- Implement enhanced compliance including mid-construction blower door testing -2023-2026
- Implement blower door tests for all corporate building retrofits 2026-2030

BENEFITS & CONSEQUENCES

- Proactively prepare for higher-step mandates and equivalents
- New buildings built with lifetime efficiency in mind, focussing on whole-system design and low energy use will reduce energy use and greenhouse gases over the life of our buildings.

POLICIES, RESOURCES, TOOLS

- RDCK Building Bylaws
- RDCK Better Corporate Building Policy

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M

OBJECTIVES

Corporate structures will adhere to the Better Building Policy for RDCK Facilities to ensure that all existing buildings continue to improve its energy efficiency

ACTION

NEW

Train staff on application of Better Building Policy and Procedures develop and increase internal expertise and access to resources to assist, and support with low carbon building projects

TIMELINE

2023-2026

NEXT STEPS

- Encourage the priority of the uptake of Better Building Policy 2023-2024
- Consider re-developing the sustainability checklist or matrix to help project staff use the Better Building Policy 2023-2024
- Provide support for implementation on specific projects 2023-2026
- When hiring staff consider expertise in low carbon/green buildings On-Going
- Conduct a pilot project on a new corporate building or major renovation using the Better Building Policy as a guide for contractors (eg. low carbon building material options considered, energy/design planners use integrative planning process, etc.) 2023-2026

BENEFITS & CONSEQUENCES

• Helps staff align with Board mandates and achieve emission reductions

POLICIES, RESOURCES, TOOLS

• RDCK Better Building Policy

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A

Lower total workplace carbon pollution and energy consumption in both corporate and RDCK-controlled community buildings/facilities

ACTION

Utilize a building monitoring soft-ware to monitor energy consumption/efficiency and carbon pollution for all corporate and RDCK-controlled community buildings/facilities

TIMELINE

2023- On-Going

NEXT STEPS

- Update Portfolio Manager (or other building monitoring software) to include all corporate & RDCK-controlled community buildings - 2023-2024
- Track and collect data regarding corporate building operational energy and carbon pollution through building monitoring software (eg. Portfolio Manager) On-Going
- Produce annual summaries for RDCK owned/operated buildings/facilities On-Going

BENEFITS & CONSEQUENCES

 Data produce will help identify ways to reduce carbon pollution & improve efficiency/ building management and maintain transparency on carbon pollution and progress towards targets

POLICIES, RESOURCES, TOOLS

• Portfolio Manager

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M

ACTION

Utilize data collected from building monitoring software to make improvements to corporate buildings/facilities operation and management, and identify costeffective energy retrofits

TIMELINE

2024-2030

NEXT STEPS

- Provide training to staff on how to utilize this resource 2023-2024
- Develop Building Operational/Management policies/guidelines (such as RDCK Operations and Maintenance Guidelines) to support best practices and sustainable decision-making processes in the management of RDCK buildings/facilities - these can be developed using working groups and specific to types of buildings (already exists for recreation facilities,) - 2023-2026
- Integrate building operations/management into Asset Management Plan and Asset Manager's role 2023-2026
- Explore options to improve the energy efficiency and renewable generation of RDCK buildings through upgrades and retrofits On-Going
- Consider smart thermostats and other technologies/strategies to reduce carbon pollution 2023-2026

BENEFITS & CONSEQUENCES

• Supports sustainable decisions and reduced carbon pollution in renovated buildings

POLICIES, RESOURCES, TOOLS

- Portfolio Manager
- BC Step Code
- Better Buildings Policy
- 100% Renewable Energy Plan
- RDCK Asset Management Plan (when completed)

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A

FOOD & AGRICULTURE

GOAL

Support regional development of a sustainable and resilient food system, through climate adapted agricultural crops and strategies that enhance local food security, and ensure access for all residents

OBJECTIVES

Support efforts to improve the capacity, feasibility, and climate resiliency of local agriculture

ACTION

NEW

Support local farmers in accessing funding to upgrade irrigation and water storage infrastructure

NEXT STEPS

- Work with key partners (Canadian Agriculture Partnership, Environmental Farm Plan program, Columbia Basin Trust and others) to offer a grant program to defray the costs of shifting irrigation infrastructure to enable the most efficient use of water
- Participate in Water Management Advisor Program that would provide specific guidance on suitable water storage options for options and to assist with permit and cost-share applications
- Participate in pilot/demonstration water storage projects

TIMELINE

On-Going

BENEFITS & CONSEQUENCES

 Water storage has potential co-benefits (flood mitigation, fire protection, wildlife enhancement)

POLICIES, RESOURCES, TOOLS

- Central Kootenay Food Policy Council (Evidence Based Planning Project)
- Kootenay and Boundary Adaptation Strategies for Agriculture Plan

CONTROL /INFLUENCE: Influence **MITIGATION /ADAPTION:** A

ACTION

NEW

Support local farmers in accessing funding to plant climate resilient crops, implement climate adapted agricultural strategies and climate resilient

NEXT STEPS

- Advocate to Province for infrastructure Hoophouse/greenhouse funding program in anticipation of multi-year climate action funding - 2023
- Promote or consider partnerships or co-funding opportunities for farm flood adaptation measures - 2024-2026

BENEFITS & CONSEQUENCES

- Increase regional food system sustainability and security
- Riparian protection/management leverage co-benefits (wildfire protection, flood management, habitat conservation)

POLICIES, RESOURCES, TOOLS

• Linking Farmland to Floodplains Report (Kootenay & Boundary)

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: A

TIMELINE

infrastructure

upgrades

2023-2026

Support efforts to improve the capacity, feasibility, and climate resiliency of local agriculture

ACTION

NEW

Encourage and support local food production (farmers` markets, home gardens/urban food production, etc.)

NEXT STEPS

- Consider ways to support regional agrotourism (market tours/map/guide, cannabis tourism, etc.)
- Add a link to the CKFPC Food Directory on RDCK website

BENEFITS & CONSEQUENCES

- Increase regional food system sustainability and security
- Incentivizes local agriculture

POLICIES, RESOURCES, TOOLS

• Census Canada

TIMELINE 2023-2024

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M&A

ACTION

NEW

Support producers, and processors as shifting temperature and precipitation patterns result in food systems variability towards overall resilience

TIMELINE

2024

NEXT STEPS

- Support development of tools related to agricultural decisions based on weather data
- Support research/knowledge sharing of innovative management practices for dealing with increased climate variability (fact sheets, online knowledge hub, workshops)
- Promote & distribute farm flood risk information and readiness resources
- Support efforts to identify pests/invasive species of concern & appropriate best practices (biological & mechanical controls, relationship between soil health (pH, nutrients, etc.) & pests)
- Explore and promote programs to reduce carbon pollution along regional food supply chains, from the farm level through aggregation, distribution, retail / restaurants and households (eg. reducing nitrogen fertilizer use, increasing the use of cover crops, protecting riparian and treed areas, reduction in fossil fuel use / electrification of equipment and vehicles, reducing food waste, etc.)

BENEFITS & CONSEQUENCES

• Increase regional food system sustainability and security

POLICIES, RESOURCES, TOOLS

• Census Canada

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M & A

NEW

Explore further partnership opportunities with water stewardship groups in the region to support efficient water use in agriculture and food production

NEXT STEPS

- Support the development and encourage the uptake of water consumption tracking tools
- Explore the creation of an agricultural water advisory committee
- In collaboration with relevant stakeholders, develop measures that provide adequate access to water for food production.
- Support the development of adapted water management techniques that respond to climate variability (flood and drought conditions) and support consistent production

BENEFITS & CONSEQUENCES

• Identify ways to conserve and protect water resources and adapt to climate-induced water shortages

TIMELINE

2024

POLICIES, RESOURCES, TOOLS

- Climate Change Adaptation Program: Regional Adaptation Strategies Kootenay & Boundary
- Agricultural water demand modelling
- Agricultural Land Use Inventories

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: A

OBJECTIVES

Ensure that food production and agricultural support efforts/initiatives are provided in a manner that is equitable and accessible to all demographics

ACTION

NEW

Collaborate with relevant organizations (emergency food providers, colleges, employment services, etc.) to develop low barrier funds, training and other support programs for Black, Indigenous and People of Colour who wish to farm or develop food businesses.

TIMELINE

2024

NEXT STEPS

- Aid in the development and dissemination of a solid understanding of food insecurity stressors and cycles (for example, months with five weeks between social assistance cheques, lack of school meal programs in the summer months, holidays, school fees) in order to gather information and generate actions to better support those who are impoverished and hungry in the Central Kootenay
- Consider hosting workshops to bring together different groups to look at common challenges, or attending industry production meetings with educational materials as farmers from various demographics already attend these

BENEFITS & CONSEQUENCES

• Ensures climate-related efforts are offered through a lens of equity

POLICIES, RESOURCES, TOOLS

• Agricultural Bylaw for Areas A,B,C; RDCK Agricultural Plan

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M&A

Develop and update policies and regulation to support local agriculture and climate resiliency

ACTION

NEW

Explore regulatory changes that could support on-farm water storage

TIMELINE

2025

NEXT STEPS

- Consider an update of Official Community Plans
- Learn from Yaqan Nukiy on wetland restoration
- Update RDCK Area Agriculture Plan to include climate adaptation considerations

BENEFITS & CONSEQUENCES

• Water storage has potential co-benefits (flood mitigation, fire protection, wildlife enhancement)

POLICIES, RESOURCES, TOOLS

• Census Canada

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: A

ACTION

NEW

Continue to advocate for smallscale livestock farming

TIMELINE

2023

NEXT STEPS

- Encourage discussion with municipalities on bylaws regarding backyard livestock (draw on lessons learned in other jurisdictions with similar wildlife interfaces to develop suitable requirements of residents to ensure safe keeping of the animals) Rossland allows backyard chickens and could be used as a case study by other municipalities
- Continue advocacy for ease of meat regulation on farmers

BENEFITS & CONSEQUENCES

• Incentivizes local agriculture

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M & A

OBJECTIVES

Establish and nurture partnerships with a wide variety of involved organizations, and actively maintain a high level of regional collaboration on local agriculture initiatives

ACTION

Actively pursue opportunities to collaborate, and provide support for actions and efforts regarding climate action and food network resiliency including education/outreach, funding, policy updates/development and partnerships (staff and administrative supports)

NEXT STEPS

- Facilitate or support industry/stakeholder engagement, education, and networking opportunities for the local agricultural community (workshops, networking and knowledge sharing events, online knowledge hub, etc.)
- Partnership development (research, small-farm support networks/resources, etc.)
- Use communications platforms to educate about food, partnering with Interior Health, local farm organizations, food policy council, and emergency food providers.
- Provide support to area employment & career services, colleges to retrain unemployed workers in sectors impacted by the pandemic, based on employment needs and viable career options in Central Kootenay business community (farm /food related)
- Collaborate with partners (Columbia Basin Trust, ETSI-BC, Credit Unions and others) to create a fund for local food purchasing at emergency food services, available on an as needed basis.

BENEFITS & CONSEQUENCES

• Increase regional food system sustainability and security

TIMELINE

On-Going

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

ACTION Continue funding and active collaboration with the Central Kootenay Food Policy Council (CKFPC) BENEFITS & CONSEQUENCES • Increase regional food system sustainability and security and support for local farmers CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A TIMELINE Annual

NEXT STEPS ACTION • Participate in Strategic Planning process - 2023 Maintain the agricultural **BENEFITS & CONSEQUENCES** extension service • Increase regional food system sustainability and security and support for local farmers through the Kootenay Boundary **CONTROL /INFLUENCE:** Control **MITIGATION /ADAPTION:** M&A Farm Advisory (KBFA) in the RDCK **TIMELINE** Annual

GOAL

Strengthen watershed governance and implement adaptive strategies to protect drinking water and agricultural water supply

OBJECTIVES

Enhance regional water conservation

ACTION

NEW

Regional WaterSmart Ambassador program

TIMELINE

2023-2024

NEXT STEPS

- Re-establish Regional WaterSmart Ambassador program 2023 (restart)
- Improve/update the old program through engagement with Community Advisory Committees (CAC's) and consider developing an engagement tool 2023-2024
- Ensure program educates and supports public on water conservation measures (low-flow appliances, rainwater applications, water storage, etc.) 2023

BENEFITS & CONSEQUENCES

• Decreased water demand through increased water conservation awareness

POLICIES, RESOURCES, TOOLS

- Watershed Governance Initiative Scoping Study, Webmap, and Story Map
- Lobbying Provincial Government
- Irrigation assessments onsite of private properties; Xeriscape Demonstration Garden Tours and learning sessions

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: A

ACTION

NEW

Support demand side management

TIMELINE

On-Going

NEXT STEPS

- Partner with farms/greenhouses on water metering and conservation consider incentives (eg. privileging water access to farms metering and demonstrating a certain level of stewardship) - 2023-2026
- Consider Erickson for farm metering opportunities (Creston already has some voluntary water metering on farms) 2023-2024
- Advocate for metering of high-water consumption industries such as golf courses 2023-2026

BENEFITS & CONSEQUENCES

- Decreased water demand
- Help avoid water shortages
- Helps the agricultural community demonstrate water stewardship

POLICIES, RESOURCES, TOOLS

• Water Conservation Strategy

CONTROL /INFLUENCE: MITIGATION /ADAPTION: M & A

Creating the conditions for regional collaborative decision making to protect watersheds where drinking water sources are at risk

ACTION

Implement the Watershed Governance Initiative

TIMELINE

2023-2026

NEXT STEPS

- Phase 3 relationship building, investigation of Water Sustainability Plans, community watersheds planning tools, On-Going story and web mapping 2022
- Conduct a cumulative impact study of the Duck Creek Watershed 2023
- Phase 4 Investigation of a Drinking Water Watershed Protection Service 2023

BENEFITS & CONSEQUENCES

- Increased public access to data, information and resources regarding private water systems
- Help public protect and understand drinking water systems (by encouraging data collection and monitoring)

POLICIES, RESOURCES, TOOLS

- RDCK Watershed Governance Scoping Study
- Water Sustainability Act
- Drinking Water Protection Act

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: A

ACTION

Re-establish regional surface and ground water monitoring

NEXT STEPS

• Working with Living Lakes on surface and ground water monitoring programs - 2023

BENEFITS & CONSEQUENCES

• Increased public access to data, information and resources regarding private water systems

TIMELINE

2023-2026

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: A

ACTION

Build partnerships with First Nations

TIMELINE

On-Going

NEXT STEPS

- Work with Yaqan Nukiy on support watershed governance in Creston Valley-Yaqan Nukiy?amak?is
- Work with Sinixt-Colville Confederated Tribes and Syilx-Okanagan Nation Alliance in creating the Slocan Lake and River Partnership

BENEFITS & CONSEQUENCES

- Build government to government relationships
- Learn Indigenous ways of being
- Learn about Indigenous led watershed governance systems

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: A

Focus on water protection as well as watershed landscape planning

ACTION

Develop Source Water Protection Plans (SWPPs)

TIMELINE

On-Going

NEXT STEPS

• Establish collaborative decision making conditions through the WGI then explore individual SWPPs - On-Going

BENEFITS & CONSEQUENCES

- Help to ensure long-term regional water supply resiliency
- Decreased water contamination and watershed degradation

POLICIES, RESOURCES, TOOLS

• Okanagan Water Board - Source Water Protection Toolkit

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: A

OBJECTIVES

Undertake and complete capital infrastructure upgrades to address system leakage, storage capacity, and water quality concerns

ACTION

Arrow Lakes Facility upgrade to improve energy efficiency

TIMELINE

2023-2024

NEXT STEPS

• Cost benefit analysis for fuel options - 2023

BENEFITS & CONSEQUENCES

• Decreased costs and emissions

POLICIES, RESOURCES, TOOLS

• Better Building Policy

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M

ACTION

Mainline Replacements

TIMELINE

On-Going

NEXT STEPS

- Pursue funding On-Going
- Build climate lens and carbon pollution into grant applications 2023 (work on language)

BENEFITS & CONSEQUENCES

- Decreased leakages, lowered rates
- Help avoid water shortages

POLICIES, RESOURCES, TOOLS

- Mainline replacement
- Universal metering implementation

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

Improve management of RDCK systems to prepare for the impacts of climate change

ACTION

Increase level of monitoring on RDCK water systems

TIMELINE

2023

NEXT STEPS

- WGI Phase 3 2023-2024
- Consider partnering with agricultural industry/farmers on watershed/supply monitoring and data collection efforts 2023-2026

BENEFITS & CONSEQUENCES

• Increased data availability

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: A

ACTION

Implement Leak
Detection System

TIMELINE

2023-2030

NEXT STEPS

- Need and priority assessment for each RDCK water system 2023
- Flow & consumption analysis & field work to find leaks 2023-2024

BENEFITS & CONSEQUENCES

• Identify leaks

POLICIES, RESOURCES, TOOLS

Leak Detection Strategy

CONTROL /INFLUENCE: Control M

MITIGATION /ADAPTION: M&A

ACTION

Implement Metering Implementation Strategy

TIMELINE

2023-2030

NEXT STEPS

- Need and priority assessment for each RDCK water system 2023-2024
- Implement metering in Erickson (funding for 100 meters) 2023-2024
- Advocate for metering of all RDCK water systems (universal metering) 2030

BENEFITS & CONSEQUENCES

- Identify worst offenders
- Increased costs for some users?
- Decreased unregulated water use
- Help avoid water shortages

POLICIES, RESOURCES, TOOLS

• Metering Implementation Strategy

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: M&A

GOAL

Reduce the risk of wildfire within the wildland urban interface (WUI) throughout the region, by increasing community fire-resiliency to adapt to more frequent and intense wildfires.

OBJ

OBJECTIVES

Increase participation in FireSmart Program (number of neighbourhoods in Neighbourhood Recognition Program and number of Home Partner Program assessments and certifications)

ACTION

Increase the number of FireSmart Home Partners Home Program (HPP) Assessments

NEXT STEPS

- Promote and provide easy access and education on the FireSmart program and its benefits (300 per year)
- Continue incentivizing uptake of the FireSmart program

BENEFITS & CONSEQUENCES

• Improved community fire resiliency, reduced risk of forest fires starting from urban ignition

TIMELINE

On-Going

POLICIES, RESOURCES, TOOLS

- FireSmart Program
- Community Wildfire Protection Plan (CWPP's)
- Community Wildfire Resiliency Plans (CWRPs)

CONTROL /INFLUENCE: Influence **MITIGATION /ADAPTION:** M & A

ACTION

Increase the number of FireSmart Neighbourhoods that participate in the FireSmart Neighbourhood Recognition Program

NEXT STEPS

- Promote and provide easy access and education on the FireSmart program and its henefits
- Continue incentivizing uptake of the FireSmart program

BENEFITS & CONSEQUENCES

• Improved community fire resiliency, reduced risk of forest fires starting from urban ignition

TIMELINE

On-Going

POLICIES, RESOURCES, TOOLS

• FireSmart Program

CONTROL /INFLUENCE: Influence **MITIGATION /ADAPTION:** M & A

ACTION

Increase the number of FireSmart HPP certifications

NEXT STEPS

- Promote and provide easy access and education on the FireSmart program and its benefits
- Continue incentivizing uptake of the FireSmart program

TIMELINE

On-Going

BENEFITS & CONSEQUENCES

- Improved community fire resiliency, reduced risk of forest fires starting from urban ignition
- Increase likelihood of insurance policy reductions or incentives

POLICIES, RESOURCES, TOOLS

FireSmart Program

CONTROL /INFLUENCE: Influence MITIGATION /ADAPTION: M & A

Incorporate wildfire adaptation measures through building and land planning management to reduce wildfire risk

ACTION

Incorporate Wildfire Develop Permit Areas into all Official Community Plans

TIMELINE

2023-2030

NEXT STEPS

- Develop engagement & communication strategy for DPA 2022-2023
- Provide education and support around procurement of appropriate building materials to contractors, suppliers, homeowners 2022-2023
- Work with elected officials to add DPA to OCPs prior to renewals On-Going
- Add DPA to Community Wildfire Resilience Plans- On-Going
- Lobby insurance companies regarding building materials 2023-2026

BENEFITS & CONSEQUENCES

• DPA -encourages appropriate siding/materials (upstream action), landscaping choices and location of structures

POLICIES, RESOURCES, TOOLS

- DPA's
- OCP's
- CWRP's

CONTROL /INFLUENCE: Control & Influence MITI

MITIGATION /ADAPTION: M & A

OBJECTIVES

Adapt to increasing wildfire risk through emergency preparedness efforts

ACTION NEW

Help prepare the agricultural sector for wildfire emergency situations

TIMELINE

2023-2026

NEXT STEPS

- Promote & distribute agricultural wildfire preparedness guide/resources 2023-2026
- Encourage all farms to have wildfire preparedness plans (Provincial program) 2023-2026
- Ensure relevant info shared with response agencies (contact info, maps, equipment list) 2023
- Offer specified Farm and Ranch Critical Infrastructure FireSmart Assessments

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: A

Mitigate and adapt to wildfire risk by creating fuel-breaks around at-risk communities

ACTION

Coordinate landscape level fueltreatment efforts

TIMELINE

On-Going

NEXT STEPS

- Establish and support community FireSmart resiliency committees (regional started, work towards expanding the number of subregional committees) and coordinate between committee levels On-Going
- Develop centralized database for landscape fuel treatments 2023-2026
- Explore development of Forest Landscape Plans to replace Forest Stewardship Plans gives control to community & First Nations 2023-2026
- Partner with First Nations, licensees, land managers, etc. (assess current state/model future progressions eg. timber value, water quality) On-Going
- Explore adding staff/capacity for landscape-level planning (assess conditions) leverage committees to identify workplans for subregions 2023-2026
- Explore alternative partnerships on fire-mitigation efforts and achieved co-benefits (eg. Fortis BC, BC Hydro, farms/agriculture, etc.) 2023-2026

BENEFITS & CONSEQUENCES

• More effective approach to wildfire mitigation efforts and consistent data to base future decisions upon

POLICIES, RESOURCES, TOOLS

- Community Wildfire Protection Plan (CWPP's)
- Community Wildfire Resiliency Plans (CWRPs)

CONTROL /INFLUENCE: Control & influence **MITIGATION /ADAPTION:** M & A

ACTION

Support/encourage better wildfire mitigation practices (excavator use, improved mechanization, fibre utilization), and explore novel/alternative fuel mitigation methods through studies and pilots

TIMELINE

On-Going

NEXT STEPS

- Investigate best practices including historic & current indigenous practices On-Going
- Provide education on best practices (or benefits/limitations of various practices/fuel mitigation methods) - 2023-2026
- Investigate chipping services funding/promotion program 2024
- Consider the findings of FP Innovations' study in Rossland regarding Hugelkultur methods 2023
- Explore agricultural fuel-mitigation techniques (eg. pilot alternate grazing options), and develop tools/resources to support fuel management on farms and crown land with range tenures (incentives/funding, farm assessments) 2022-2030

BENEFITS & CONSEQUENCES

• Improved fuel mitigation practices

POLICIES, RESOURCES, TOOLS

- Neighbourhood Emergency Preparedness Program
- RDCO / City of Kelowna has a free woodchipping service for wildfire interface areas woodchipping as opposed to burning helps maintain air quality

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M & A

FLOODS & GEOHAZARDS

GOAL

Reduced community vulnerability through supporting and promoting emergency preparedness, risk assessments, and assessing infrastructure opportunities for adaptation against increased flooding and geohazard events

OBJECTIVES

Increase emergency preparedness and resilience of communities

NEXT STEPS

ACTION

Enhance the Neighbourhood Emergency Preparedness Program (NEPP)

BENEFITS & CONSEQUENCES

• Promote community involvement

and improve the NEPP

• Ensures that the NEPP process is effective and meets communities needs and realities

Consult and engage with participants to learn about best practices from them to refine

TIMELINE

2023-2026

POLICIES, RESOURCES, TOOLS • Neighbourhood Emergency Preparedness Program

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: A

NEW **ACTION**

Increase outreach and education focused on riparian management ecosystem and habitat protection

NEXT STEPS

- · Continue to support habitat conservation and education work with Friends of Kootenay Lake (podcasts) & Kootenay Conservation (eg. community workshops, conservation/ sensitive habitat protection advocacy, etc.) - 2023
- Seek collaboration with community organizations on education and outreach efforts - On-Going
- Continue to support invasive species management with Central Kootenay Invasive Species Society - 2023-2026

TIMELINE

2023-2026

BENEFITS & CONSEQUENCES

• Increased awareness and action around protection of sensitive habitat and species at risk

CONTROL /INFLUENCE: Control & Influence **MITIGATION /ADAPTION:** A

OBJECTIVES

Support communities in developing resilience to flood and geohazard risk

ACTION

NEW

Include NDMP Stream 1 findings in publicly available web map

NEXT STEPS

- Monitor developments on Provincial flood mapping
- If Provincial product is not developed then create RDCK public map

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: A

TIMELINE

2025-2026

NEW

Increase expertise regarding flood risk

NEXT STEPS

• Build internal expertise and develop capacity of staff

POLICIES, RESOURCES, TOOLS

- National Disaster Mitigation Program (NDMP)
- Neighbourhood Emergency Preparedness Program
- Risk Tolerance Policy

TIMELINE 2023-2026

CONTROL /INFLUENCE: Influence

MITIGATION /ADAPTION: A

OBJECTIVES

Create risk reduction strategies for identified high risk areas

ACTION

NEW

Develop hazardspecific DPAs for flood-prone areas

NEXT STEPS

• Consider combination Development Permits (risks - eg. steep slope, alternate exits, riparian protection) and pursue co-benefits

TIMELINE

2023-2026

POLICIES, RESOURCES, TOOLS

- Flood & Steep Creek Geohazard Risk Prioritization (NDMP funded)
- Risk reduction policies (bylaws, OCPs, development permit area (DPA)

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: A

OBJECTIVES

Establish acceptable risk tolerance threshold for all areas in the RDCK

ACTION

NEW

Develop criteria for qualified professionals to determine what is 'safe' when developing hazard areas

NEXT STEPS

- Secure grant funding 2023
- Hire consultant to develop criteria for qualified professionals to determine what is 'safe' when developing hazard areas 2023
- Seek Board approval 2024

CONTROL /INFLUENCE: Control

TIMELINE

2023-2024

MITIGATION /ADAPTION: A

Consider flood and geohazard risk within the RDCK when making land use decisions

NEXT STEPS

permits

ACTION

Integrate RDCK Floodplain & Steep Creek Study results into policy then amend OCPs

BENEFITS & CONSEQUENCES

- Protection of infrastructure, economy, and ecosystems
- Improved public safety and wellbeing

TIMELINE

2023-2030

POLICIES, RESOURCES, TOOLS

- RDCK Floodplain & Steep Creek Study
- Risk reduction policies (bylaws, OCPs, development permit area (DPA)

• Pursue/secure funds for consultant to do this – especially for steep creek development

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: A

OBJECTIVES

Develop the flood risk maps for high risk areas and continue to pursue funding for maps of other high hazard areas

ACTION NEW

Consider mapping more of the identified high risk areas (16 of 29 completed so far)

TIMELINE 2025-2030

NEXT STEPS

- Advocate to the Province for additional mapping efforts (Province is already looking at this since the 2021 flooding event in the Fraser Valley and other areas)
- Apply for additional funding when available to do more mapping

BENEFITS & CONSEQUENCES

• Improved information for planning and development decisions

POLICIES, RESOURCES, TOOLS

- Flood Risk Assessment Mapping and Mitigation Planning
- Risk report policy document (when completed)
- NSFPA mapping older with more conservative risk levels identified

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: A

LEADERSHIP & OPERATIONS

GOAL

Incorporate a climate lens into all RDCK decision making and policies to demonstrate that the RDCK prioritizes climate action and adaptation

OBJECTIVES

Develop and maintain robust carbon pollution and energy inventories to accurately inform decision makers and to track direct impacts and progress towards climate action targets

ACTION

Collect comprehensive and quality corporate and community energy/carbon pollution data and update on an annual basis

TIMELINE

2023, 2024, 2025, 2026

NEXT STEPS

- Use carbon pollution data from Portfolio Manager (corporate buildings), telematics and/ or fuel consumption (corporate fleet), and landfills (community waste) to enhance data provided through annual Provincial CEEI updates - begin 2023 and update annually
- Utilize the Fleet Assessment and EV Fleet Strategy to drive data collection on RDCK transportation-related emissions 2023-2026

BENEFITS & CONSEQUENCES

• Track, evaluate, and maintain transparency on progress towards carbon pollution reduction targets, identify opportunities to drive carbon pollution reduction, align with requirements to secure LGCAP funding (and other funding opportunities)

POLICIES, RESOURCES, TOOLS

• Provincial CEEI data (community building, transportation and landfill carbon pollution data)

CONTROL /INFLUENCE: Control & Influence

MITIGATION /ADAPTION: M

ACTION

Integration of
Finance department
into reporting and
tracking, and climate
action planning

TIMELINE

2023

NEXT STEPS

• Integrate climate action into financial planning by 1) prioritizing mitigation capital projects, strategic plans and documents and 2) increasing operating budgets, to achieve climate & energy goals - 2023

BENEFITS & CONSEQUENCES

• Clear communication to staff and the community that 1) much greater sustained progress on carbon pollution reductions is necessary, and 2) that much more ambitious actions on the climate should be taken at the local level,

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M&A

Provide leadership and participate in multi-agency initiatives to accelerate climate action & mitigation efforts within the RDCK

ACTION

Collaborate with other agencies to determine common goals and work together

TIMELINE

2023-2030

NEXT STEPS

• Explore climate action culture programs to facilitate inter-agency collaboration (eg. Tamarack Institute's Climate Transitions Network)

BENEFITS & CONSEQUENCES

• Risk of missing progressive targets and goals and the social & political repercussions of this, while still acting as regional climate leaders

CONTROL /INFLUENCE: Control & Influence MITIGATION /ADAPTION: M & A

OBJECTIVES

Update and improve RDCK systems and guiding documents to better support and further climate actions and initiatives

ACTION NEW

Develop an Asset
Management
Plan for climate
adaptation starting
with an asset
inventory while
incorporating region
specific climate
projections and
impacts

TIMELINE

2023-2026

NEXT STEPS

- Develop inventory of assets (Value Statement can be used as a facility inventory) 2022
- Assess RDCK software needs and availability to support asset management planning and implementation - 2023
- Develop an Asset Management Plan (including an asset management system for all facility data) - 2023-2026
- Create an Asset Manager position to liaise between Finance and other departments regarding asset management 2025-2026
- Integrate energy-efficiency considerations, based on emissions data, into an Asset Management Plan 2024-2026

BENEFITS & CONSEQUENCES

 Helps the RDCK understand and better manage current assets and related decisions, and identify ways to improve decisions and operations to reduce climate impacts and improve sustainability

POLICIES, RESOURCES, TOOLS

- Climate Adaptation Asset Management Training
- 100% Renewable Energy Plan

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A

Redevelop the Purchasing Policy and integrate climate, sustainability and equity lens.

TIMELINE 2023-2026

NEXT STEPS

- Pursue Board direction for a review of the current Purchasing Policy consideration of climate, sustainability and equity lens - 2023
- Hire Purchasing Agent to conduct this work 2023-2024
- Enact local food procurement policies for all RDCK events and institutions that set and meet targets for local products - 2023-2024

BENEFITS & CONSEQUENCES

 Purchasing Policy should reflect climate action goals including preference for local (low-carbon) food and other products, as well as promote ecological goods and services that compensate farmers who provide environmental services to the broader community through their stewardship practices

CONTROL /INFLUENCE: Control & Influence **MITIGATION /ADAPTION:** M

ACTION

NEW

Build in-house climate action expertise

TIMELINE On-Going

NEXT STEPS

- Work with leadership series to support internal capacity development 2024
- Promote RDCK Climate Action commitments on all corporate materials 2023
- Include climate action lens on Board reporting 2023

BENEFITS & CONSEQUENCES

- Builds in-house expertise on climate considerations
- Helps support the development of internal climate-conscious culture
- Maintain in-house expertise on key elements and opportunities that foster regional food security, including land availability, relevant zoning, electricity and water infrastructure to assist in the expansion of food production in the region

CONTROL /INFLUENCE: Control **MITIGATION /ADAPTION:** M&A

ACTION

Enhance Emergency Management Services

TIMELINE

2023-2025

NEXT STEPS

- Review Emergency Management Framework documents to guide the RDCK in preparing for, responding to and recovering from emergencies - 2023
- Develop an organizational Business Continuity Plan 2024

CONTROL /INFLUENCE: Control & Influence

MITIGATION /ADAPTION: A

Align decision making with the RDCK's carbon pollution targets in all areas (land use & planning, building construction, project management) and provide staff with resources to support climate targets and goals

ACTION

Provide support, education, and implementation of new climate action policies and guidelines

TIMELINE 2023

NEXT STEPS

- Develop an asset management system for all facility data 2023-2026
- Integrate energy-efficiency considerations, based on emissions data, into an Asset Management Plan 2023-2026

BENEFITS & CONSEQUENCES

- Helps to ensure that new policies are understood, adopted, and implemented effectively
- Clear communication to staff and the community that 1) much greater sustained progress on reduction of carbon pollution is necessary, and 2) that much more ambitious actions on the climate should be taken at the local level

POLICIES, RESOURCES, TOOLS

• Updated policies

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M&A

ACTION

Require all RDCK Board decisions to include an assessment of climate impacts (could leverage a carbon pricing policy if developed)

TIMELINE

2023

NEXT STEPS

- Review Board resolutions through a lens of climate action 2023
- Include climate and energy considerations section in Board Report Template 2023
- Coordinate across all departments and ensure that all relevant staff have the resources to coordinate, plan, implement and advance all initiatives necessary to achieve carbon pollution targets - On-Going

BENEFITS & CONSEQUENCES

- Ensures that RDCK decisions and efforts contribute and align with adopted climate action targets and goals
- Clear communication to staff and the community that 1) much greater sustained progress on reduction of carbon pollutions necessary, and 2) that much more ambitious actions on the climate should be taken at the local level, even if in the face of political challenges

POLICIES, RESOURCES, TOOLS

• Memo on Low Carbon Transportation Policy Draft

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A

NEW

Review RDCK investment portfolio to be sure investments are divested from fossil fuel creators

TIMELINE 2024-2026

TON NE

• Begin investment portfolio review – 2024

• Community investment through micro-loans — consider supporting community investment program (pay it forward) to purchase of energy saving technologies (heat pumps) or improvements (insulation) that are beyond household income (reference the Clean Foundation in Nova Scotia) - 2023-2030

BENEFITS & CONSEQUENCES

• This is a difficult one, but something that is commonly identified in action plans. The difficulty comes in for entities like the Municipal Pension Plan, where the local government has less influence and would likely amount to advocacy. Looking at direct RDCK investments through an Environmental, Social & Governance (ESG) lens is achievable though.

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M & A

ACTION

Digitization of RDCK processes

TIMELINE

2023-2026

NEXT STEPS

NEXT STEPS

- Minimizing paper collections through digitization 2023-2026
 Digitization of Building Permit collection 2023
- Develop effective and efficient digital workflows 2023-2026
- Adopting tools and software to streamline our processes 2023-2026

BENEFITS & CONSEQUENCES

- Reduction of carbon pollution and resource use (avoided employee, commercial, and public trips to sign and deliver paper documents)
- Reduced resource-use and embodied carbon pollution tied to paper production, distribution, and consumption
- Space used to store paper can be repurposed
- Reduced energy and resource demand for printing/photocopying

CONTROL /INFLUENCE: Control MITIGATION /ADAPTION: M

ACTION

NEW

Develop an internal carbon budgeting tool

TIMELINE

2024-2026

NEXT STEPS

- Research, development, and training of/around carbon pricing consideration and tools (could include forecasted increases in carbon tax, estimated future social costs of carbon emissions, consideration of corporate/community carbon targets/budgets)
 -2024-2026
- Could be implemented as an exercise to improve internal understanding and capacity -2023-2026

BENEFITS & CONSEQUENCES

• Helps quantify the costs/benefits of climate efforts/initiatives in terms of their contribution to climate targets

POLICIES, RESOURCES, TOOLS

- City of Vancouver
- City of Kamloops

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M

ACTION

NEW

Develop a Trip Avoidance Policy

NEXT STEPS

• Consider how to reduce travel kilometres amongst staff and transform eg. trees could be planted in the region to offset carbon pollution from commuter travel (also integrated into Transportation Pathway) - 2023-2024

TIMELINE

2023-2026

BENEFITS & CONSEQUENCES

• Remote working policies as a climate change strategy that is rurally focused, recognizing that the RDCK has a large sparse geography

CONTROL /INFLUENCE: Control

MITIGATION /ADAPTION: M
