4. NAKUSP LANDFILL CLOSURE & POTENTIAL COMPOST FACILITY IN NAKUSP

Amy Wilson, Resource Recovery Manager, provided a verbal report on the proposed closure of the Nakusp landfill and the potential for a compost facility in Nakusp, summarized below.

- *Need 'shovel-ready' conceptual design(s) for composting or septage facility to maximize potential grants.*
- *Resource Recovery Plan (RRP) and supporting studies outlined the costs and information which determined which landfill(s) to close.*
- *The reason we are closing the Nakusp landfill is not because we are running out of landfill space but rather to reduce cost due to increasing regulatory requirements.*
- *Advancing on composting sooner than later may reduce GHG emissions if we transport less waste to the Ootischenia landfill.*
- *The landfill closure does not impact our current septage management as we could continue the pits as long as permitted by the Ministry.*

													Lab costs: Assumes lower volumes received on site in 2024 (2 sample sets required per year if less than 2000 tonnes produced) but that additional tests are required in 2024 as part of process training. 2024: \$5k for lab samples and collection (C:N to calibrate new pile mix, 7 samples once per year for metals and pathogens, 3 additional pathogen sample tests for first few batches, 1 foreign matter test), \$5k contingency for quality failure retesting, \$5k for water monitoring based on 3 wells to sample 2x/yr, leachate pond sampling, reporting etc. 2024 onward compost sampling costs increase to \$15k to due to 3-4 OMRR sampling events required/yr when running at full tonnages, but fewer calibration tests are needed compared to when operations first start. Water sampling remains \$5k. Added 2% annual adjustment for increases to lab sampling costs and analysis etc. Draining Leachate Pond: Assumes 4 pond draining events a year (2 in 2023), at \$17k per drain (unless there is a spot closer than Nelson?). Have kept leachate pond draining costs assuming using Nelson or Fruitvale WWTP instead of just septage pits with hourly rates for truck, in case we have to go that route.
