About Your Water System

The Rosebery Highlands water system is located in a subdivision above the community of Rosebery, north of the Village of New Denver, and within RDCK Electoral Area H. It services nine (9) active connections, with an additional 12 serviceable lots located within water service area. The system was constructed in 2007 and became a RDCK service in 2012.

The Rosebery Highlands water system draws water from a deep well and utilizes chlorine disinfection for water treatment. The system includes a 275,720 liter concrete reservoir.

The distribution system consists of new 150mm diameter PVC mains. Dead-end mains in cul-de-sacs are 100mm diameter. 100mm diameter lines reduce the opportunity for stagnation of water in the mains. All dead-ends are equipped with stand pipes to allow flushing of the distribution lines.

Water Events

There were no water quality events in 2022!

Water quality is good

Your water conservation efforts help prevent water shortages! Watering using drip irrigation, a watering can or hand held hose eliminates overspray.

Water Conservation

Water conservation helps to protect and preserve our drinking water sources and ensure they are sustainable into the future. By lowering water demand, communities can mitigate the cost of water system operations and maintenance, and extend the life of their existing infrastructure.

From June 1 to September 30, Stage 1 measures go into effect every year regardless of seasonal weather patterns. The RDCK may, upon notification, impose further water conservation measures (Stages 2-4) as necessary.

Ways to reduce your water use

- Drip irrigation
- Rain harvesting
- Grass alternatives/Xeriscaping
- Low-flow shower heads
- Dual-flush toilets
- Front load wash machines
- Water wise tooth brushing/hand washing
