

Plumbing Building Type Checklist

Owner Name: _____

Plumbing permit is for building re-piping, or addition or relocation of fixtures. If plumbing work is being done as part of other work, such as a bathroom or kitchen renovation, apply for a Renovation Building Permit.

Homeowner plumbing is permitted only within a single family dwelling *within which the owner resides*.

All documentation is required at the time of permit application unless otherwise specified.

Refer to the Regional District Official Community Plan, Zoning Bylaws and Floodplain Management Bylaw for development restrictions related to your building permit application. If an application is non-compliant with applicable bylaws, it may increase the application processing time. Please check the Bylaws at rdck.ca or call 250-352-8176.
